Harness the Power of Always-On Connectivity

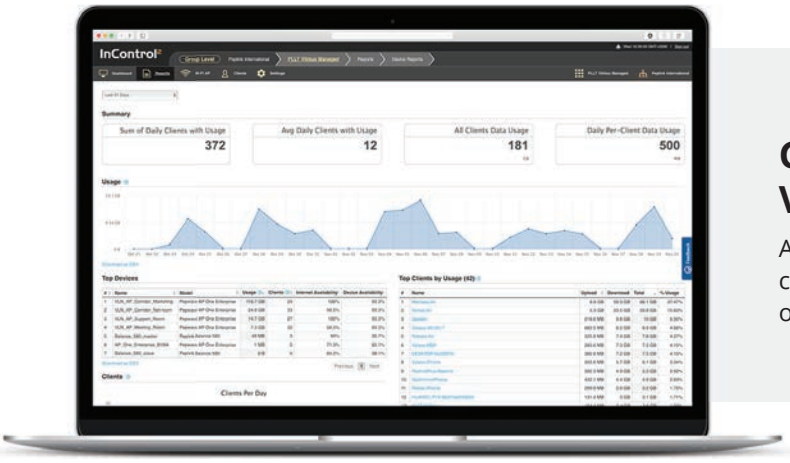
MyCloud Always-On Internet

MyCloud Always-On Internet

STAY CONNECTED. ALWAYS.

MyCloud Always-On Internet is a reliable wireless Internet backup solution that keeps your business connected, no matter what happens to your primary connection.

When your wired internet connection fails, MyCloud Always-On Internet automatically switches to a high-speed LTE or 5G cellular network connection, ensuring seamless and uninterrupted connectivity. Designed for business-critical operations, it provides dependable uptime, centralized monitoring and flexible carrier options to keep teams online and productive.



GAIN CONNECTION VISIBILITY

Always know the status of your backup connection across all your locations in our cloud-based portal.

BUILT FOR BUSINESS CONTINUITY

MyCloud Always-On Internet is designed to keep your network online and your teams productive.

- **Zero Downtime**
  Intelligent failover keeps systems running during outages.
- **Remote Visibility**
  Monitor from anywhere through our cloud-based device monitoring and reporting system.
- **Business Continuity**
  Prevent costly disruptions to POS, cloud tools and communications.
- **Network Flexibility**
  Dual SIMs for cellular carrier redundancy.

MYCLOUD ALWAYS-ON INTERNET FEATURES

MyCloud Always-On Internet utilizes failover technology, remote monitoring and carrier redundancy to deliver uninterrupted connectivity, keeping you always on.

Automatic Failover

Seamlessly switches to wireless backup when the primary connection drops.

Remote Cloud Monitoring

Monitor remotely across multiple locations.

Carrier Redundancy & SIM Flexibility

Includes the best coverage with dual SIM support.

STAY CONNECTED WHEN IT MATTERS MOST

When your business relies on continuous access to the cloud for payments or communications, even a moment of downtime can cost more than just lost productivity; it can also impact customer trust and revenue.

MyCloud Always-On Internet keeps your operations running seamlessly through any outage with intelligent failover, carrier flexibility and centralized monitoring. From retail and healthcare to remote work, it delivers reliable connectivity wherever business happens.

Retail Point-of-Sale Continuity

Avoid lost sales and customer frustration. Wireless failover ensures payment and inventory systems stay online.

Healthcare & Telemedicine

Guarantee access to patient records, telehealth sessions and communication systems 24/7.

Remote Work & Branch Offices

Keep teams productive and connected to cloud apps, even when the main network fails.
